-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Status of Application, Amendments, And/Or Claims

Claims 18-20 are pending and under examination.

Response to Arguments

Applicant's arguments filed on 8/4/2006 have been fully considered but they are not persuasive. Applicants argue that now claims 18 and 20 are amended so that the claims require an agent to promote the formation, maintenance or repair of the tissue. Applicants argue that the Snodgrass (U.S. Patent No. 6,355,237) patent teaches that leptin promotes angiogenesis and vasculogenesis but Snodgrass et al do not explicitly teach that leptin promotes the formation, maintenance or repair of tissue. Applicants argue that leptin promotes faster granulation, which is indicative of faster tissue repair.

Applicant's arguments have been fully considered but they are not persuasive because Snodgrass teach that leptin promotes angiogenesis and vasculogenesis (column 4, lines 22- 27, column 17, 30-38). They teach that leptin can be administered to a patient in various therapeutic doses that would be sufficient to ameliorate or treat various disorders and deficiencies. Therefore, administering leptin would inherently encompass tissue repair and maintenance as being instantly claimed. Further, Snodgrass et al teach administering leptin in therapeutic dosage as per need such as intravenous, subcutaneous, parenteral and intramuscular for its desired effect and that the drug delivery can be administered locally. Therefore, Snodgrass teachings explicitly or implicitly meet all limitations of the instant claims.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
